Gamma Horizon

iPECS Your Communications Solution

VoxOne

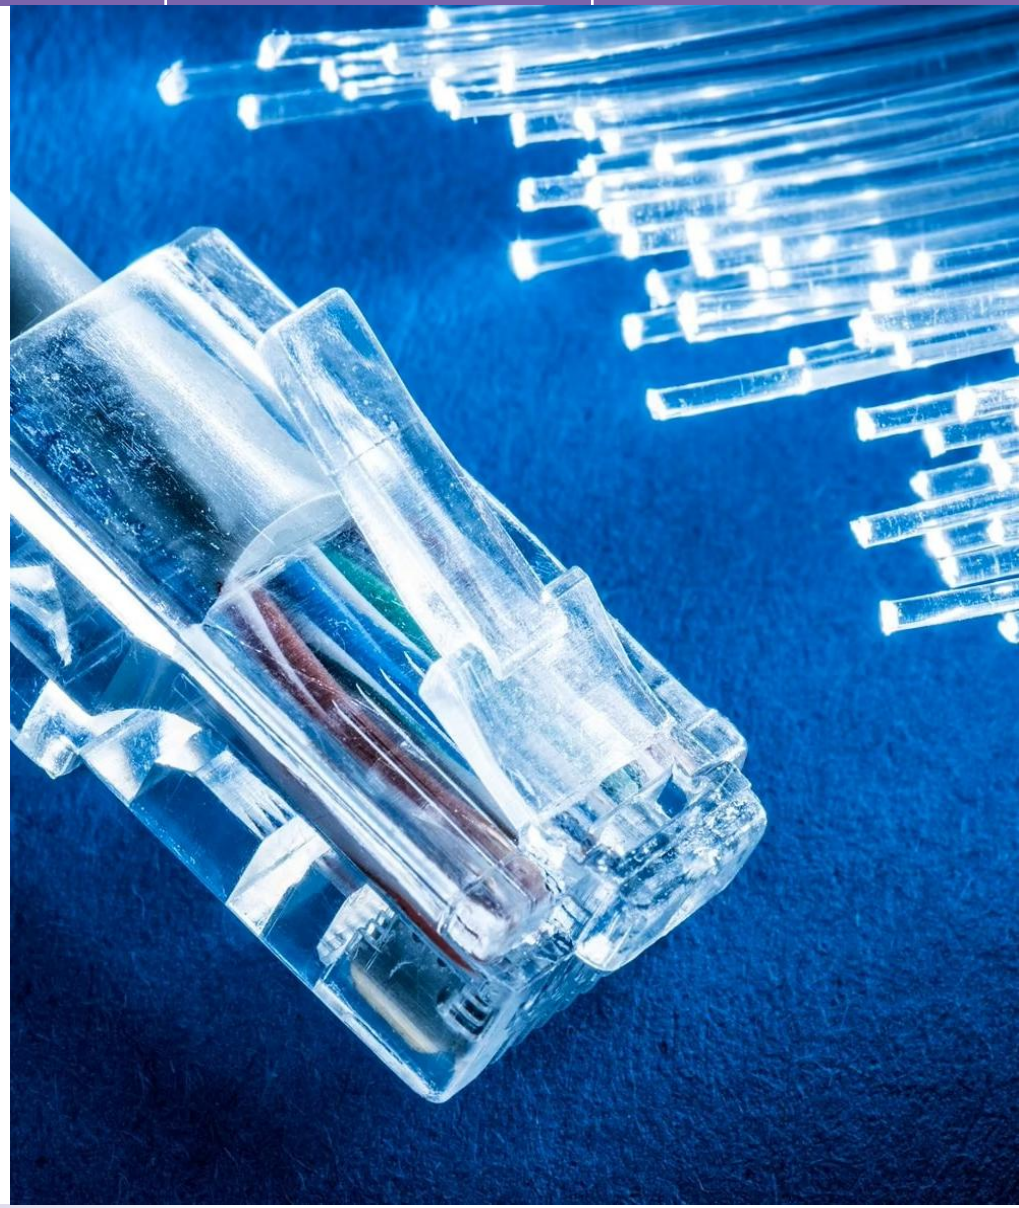

Superfast Fibre Broadband (FTTP & SoGEA)

FTTP (Fibre To The Premises): Offers full fibre speeds making it the best option for businesses looking for a mix of performance and price, for even faster speeds a leased line would be the best choice.

SoGEA (Fibre To The Cabinet): Offers faster speeds than ADSL making it an excellent broadband option for businesses moving away from outdated systems in areas where FTTP is still not available.

Speed Ranges: (Measured in Mbps)

FTTP (80/20) – (1000/115) SoGEA (80/20)

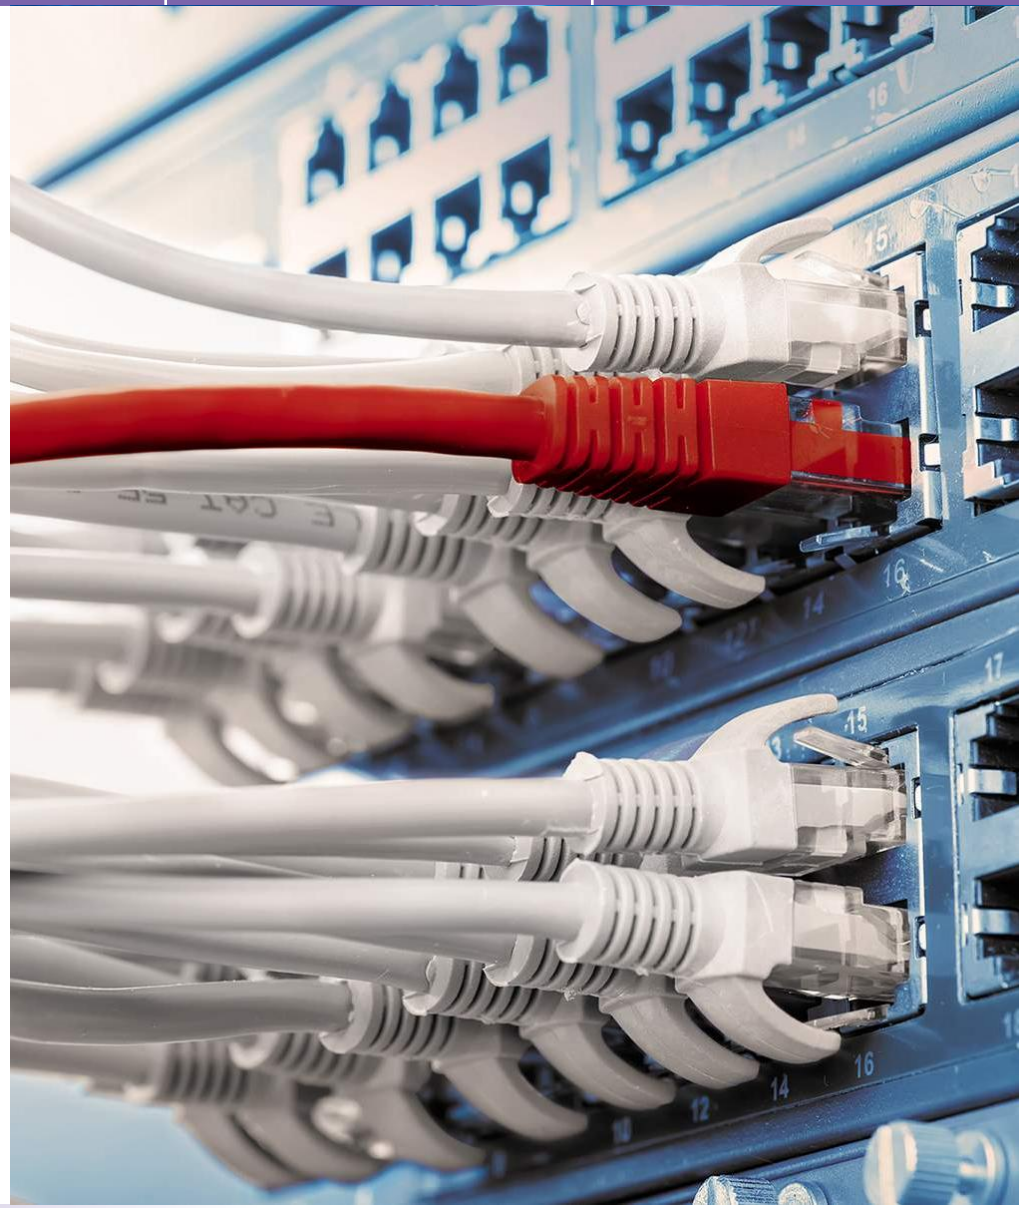

Leased Lines

Leased Lines are our top of the range option, offering speeds of up to 1G/1G, the reason leased lines are so popular is that they offer the best speeds all whilst being incredibly reliable and offering secure connections.

They are the perfect fit for larger businesses or those that require that require ultra-high bandwidth and reliability for critical operations.

Leased Lines can also be a great option for areas that have not yet received FTTP/SoGEA, offering far superior speeds compared to ADSL.

4G & 5G

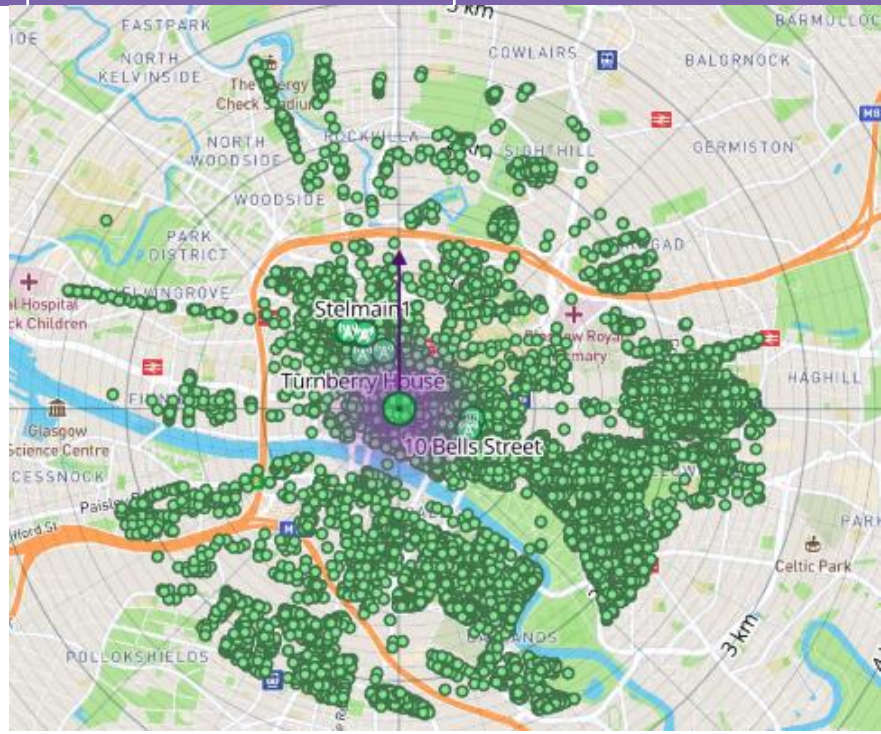

If you are in an area with limited broadband options it may be worth considering a 4G/5G solution they cost much less than a Leased Line whilst offering better speeds than ADSL, however, it may not be best suited for medium to larger scale businesses as there is only so much 4G/5G can handle.

Another excellent use for a 4G/5G setup is as a backup for your main broadband, if you rely on 24/7 connectivity a mobile broadband solutions can keep your business online.

We work with all major carriers to offer the best connectivity solutions at a fraction of the cost.

GigaAir

GigaAir is a next gen Scotland based solution for businesses in and around Glasgow city centre, as you know the fibre roll-out in Glasgow has been a long process and many businesses still do not have fibre broadband.

That is why we have partnered with GigaAir to offer superfast broadband, it works using a technology known as Line of Sight (LoS), it works like satellite broadband, except the poles are much closer by, it sends the signal directly into your building offering superfast speeds and 99.995% uptime, even in rain sleet or snow.

Visit https://gigaair.co.uk/ to find out more, or request a brochure and we will be more than happy to send one over

Dojo Card Machines

Dojo produce modern, wireless and secure card machines for businesses across the UK.

They can process payments 80% faster than the industry average speed of just 1.7 Seconds per transaction.

Competitive rates (we aim to beat or match current rates, saving you money)

Next day payments 7 days a week, including bank holidays & weekends

Free mobile app, which shows real time transactions, allowing you to see how you are getting on

Laptops & Printers

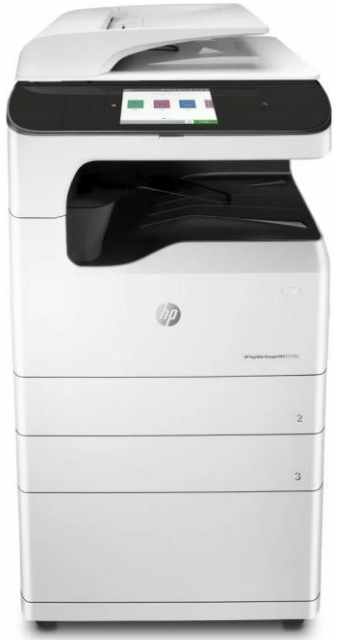

We offer a wide range of laptops & printers, so if you feel like your computer is taking too long to load, or your printer throws errors at you when you need to print off some important documents it could be the time to consider upgrading your hardware.

No matter your budget we will have an option that with suit you perfectly, from windows to mac, Toshiba to HP, we have an option for you.

All of this is backed up by our superb customer service so if you ever need a hand, we will be more than happy to help.

Mobiles & Sims

Nicola, our mobile specialist, has over 15 years of experience and knows exactly how to find the perfect deal for you. She's passionate about making sure you get the best value without any hassle.

Love iPhones? Prefer Android? Big fan of Vodafone or EE? Whatever your preference, we've got the latest handsets and plans that tick all the boxes.

Amazing prices, cutting-edge devices, and service that goes above and beyond. We're here to make upgrading simple, exciting, and stress-free.

Cyber Security

Cybersecurity is more important than ever, and we're here to make it simple, effective, and stress-free.

Our expert team can help protect your business from every angle with services designed to keep you one step ahead of the threats.

We offer comprehensive phishing simulations to train your staff, penetration testing to uncover vulnerabilities before hackers do, and Cyber Essentials accreditation to give you peace of mind and compliance confidence.

Plus, with our dark web monitoring, we'll alert you if your data ever appears where it shouldn't.

Thank You

We're delighted you've taken a moment to learn more about our product range. At Telecom Networks, we believe great communication starts with great relationships, and we're proud to support businesses like yours with solutions that make staying connected simple and stress-free.
