Yealink Profile Rules and Recovery Process

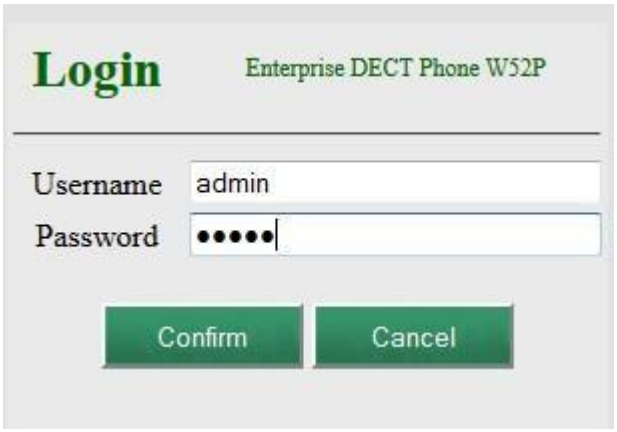

Provisioning Steps:

1. To provision a Yealink handset, first check the boot server URL by browsing to the device from the same network (and LAN) using a PC or laptop.

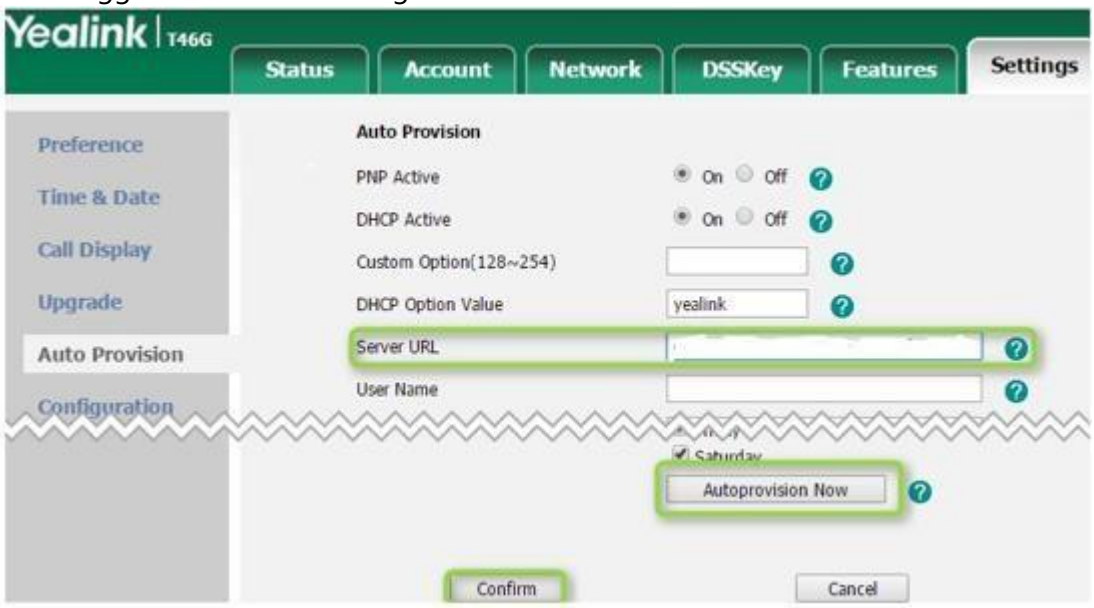

2. You will need to find the IP address of your Yealink handset, to do so, pair the handset to the base unit and press the middle button 4 times. The correct IP should then be displayed.

3. In your web browser search for the IP address of your Yealink handset which will take you to the Yealink log in page. - if it doesn't load try http://[IP] eg: " http://192.123.45.678"

   Log in info:
   - Username: admin
   - Password: admin

4. Once logged in click the Settings tab and then select Auto Provision

5. In the provisioning server text box enter the relevant profile rule (below) and then click "Auto provision now" and confirm.

- Yealink W52P - http://xsp.unlimitedhorizon.co.uk/dms/Yealink_W52P
- Yealink W73P - http://xsp.unlimitedhorizon.co.uk/dms/Yealink_W73P
- Yealink T46U - http://xsp.unlimitedhorizon.co.uk/dms/Yealink_T46U
- Yealink AX83H: http://provisioning-gb-aws.gammadm.net/horizon/yealink/ax83h/start
- Yealink T73W: http://provisioning-gb-aws.gammadm.net/horizon/yealink/t73w/start
- Yealink T74W: http://provisioning-gb-aws.gammadm.net/horizon/yealink/t74w/start
- Yealink T87W: http://provisioning-gb-aws.gammadm.net/horizon/yealink/t87w/start

6. The phone will then go through the provisioning process which will include multiple restarts and can take 15-20 minutes.

If you can't get on the IP GUI:
This could be because it recognises that it used to have a URL,
An optional thing to try would be to Factory reset and reprovision the device, should you need the steps on how to Factory Reset your device, please ask, alternatively, these steps should be available by searching "How to factory reset [Device]" in your browser.

Should you be unable to provision the device or provisioning doesn't fix your issue:
Should the above not work or you simply do not wish to try these steps, then an RMA would be the next step, please request one on the ticket.
