Setup Guide

TELECOM NETWORKS
Technology without boundaries

We have configured and tested your phone so all you need to do is plug & play, if you need more help beyond this guide please do not hesitate to give us a call at **0141 404 5441**

What's in the Box

- Base station
- Cordless handset
- Battery
- Charging cradle
- Ethernet cable
- Power adapter

Please use the new Ethernet cable and power adapter supplied.
Do not reuse cables or power supplies from your previous phone.

Step 1 – Connect the Base Station

If you have PoE

- Connect the supplied Ethernet cable to the base station.
- Connect the other end to a PoE network port.
- Wait for the **Power** and **Network** lights.

If you do not have PoE

- Connect the Ethernet cable to your router or switch.
- Connect the supplied power adapter.
- Wait for the **Power** and **Network** lights.

Important: Never connect the power adapter if the base station is already powered by PoE.

Step 2 – Power the Handset

- Insert the battery.
- Place the handset on the charging cradle.
- If it does not turn on, you may need to charge the device

Please Turn Over

Step 3 – Wait for Connection

The handset may display **Searching for Base**.

This is normal.

When connected:

- The date and time will appear.
- The handset will register automatically.
- You can then make and receive calls.

If the handset installs an update, leave it powered on until it finishes.

Step 4 – Test the Phone

- Call the handset from your mobile.
- Make an outgoing call from the handset.

Troubleshooting

Problem	Check
Handset won't pair	Power and Network lights are on, then reboot the base station.
Handset won't turn on	Battery fitted correctly and charged.
Poor signal	Move the base station to an open location near the cordless.
Still searching for base	Reboot both the handset and base station and use the supplied cables.

If you still need assistance, please give us a call at **0141 404 5441**.
